8400 Kirby Drive, Houston, TX 77054
+1.832.667.3019

SPEAKERS: Arnis Judzis, OTC .06 Chairman
Jack Caldwell, Spotlight on New Technology Chairman

TOPICS TO BE COVERED:

Join OTC .06 Chairman Arnis Judzis as he presents 13 Spotlight on New Technology awards to winning companies. The Spotlight on New Technology program recognizes innovative accomplishments within the offshore oil and gas community. Companies were selected because their products were new and innovative, proven, had significant impact, and had broad interest to the industry.

The award-winning companies will be recognized at this ceremony and during the conference with a display in the lobby of Reliant Center, a banner at each company's booth, and a special supplement to the OTC conference program, featuring each company's new technology.

This annual conference, scheduled for 1-4 May, offers an in-depth look at state-of-the-art technology being developed to meet the challenges of exploring for and producing oil and gas in offshore, deepwater environments. More than 50,000 technical professionals, managers and executives from more than 110 countries are expected to converge in Houston for this four-day event that defines the future of the offshore industry.
